

NEHA BADLANI

Java Developer | Spring Boot | REST APIs | SQL | Angular

Indore, Madhya Pradesh | 8827659665 | nehabadlani8@gmail.com | github.com/nehabadlani345 | linkedin.com/in/neha-badlani574

SUMMARY

Java Developer and B.Tech Computer Science graduate with 7 months of hands-on experience building enterprise web applications using Java, JSP/Servlets, JDBC, MySQL and REST APIs. Developed 10+ modules for a Retail ERP covering billing, sales, purchase, inventory, GST reporting and accounting, including role-based access and SQL optimization. Additionally experienced with Spring Boot, Angular, PostgreSQL and MongoDB through independent full-stack project development. Strong foundation in Core Java, OOP, Collections, SQL, DBMS and MVC architecture.

EXPERIENCE

Java Developer Intern

Feb 2026 – Present

Pushkal IT, Indore

- Developed 10+ modules for an enterprise Retail ERP — including Purchase, Sales, Vendor, Customer, Billing, Inventory and GST Reporting — using Java, JSP, Servlets, JDBC and MySQL.
- Built Vendor, Customer, Billing and GST reporting modules using Core Java, JDBC and MySQL, implementing business logic, database operations and report generation.
- Integrated backend APIs with billing and inventory workflows, including barcode-based product processing and transaction handling.
- Implemented role-based access control for Admin, Cashier and Accountant user roles, restricting module-level permissions.
- Optimized SQL queries powering Sales, Purchase and GST reporting workflows to improve report generation and database performance.

Web Developer Intern

Sep 2024 – Dec 2024

Quality Webs, Indore

- Developed responsive client websites using HTML, CSS and JavaScript, ensuring cross-device compatibility.
- Integrated REST APIs for dynamic data retrieval and frontend functionality.
- Contributed to 3 live client projects in collaboration with senior developers.

PROJECTS

Smart Placement AI — Personal Full-Stack Project

Spring Boot, Angular, PostgreSQL, MongoDB

GitHub: github.com/nehabadlani345/smart-placement-ai

- Built an AI-based placement platform end-to-end using Spring Boot (backend) and Angular (frontend).
- Developed REST APIs for authentication, resume upload and placement analytics.
- Used PostgreSQL for structured user data and MongoDB for resume storage, with role-based dashboards for students and admins.

Retail Management ERP — Developed during Pushkal IT Internship

Java, JSP, Servlets, JDBC, MySQL

- Technical deep-dive on the ERP built during the Java Developer Internship above: designed MVC architecture using JSP, Servlets and JDBC across 15+ database tables.
- Implemented GST calculation and Business/Profit-Loss reporting logic using Java and SQL, spanning Purchase, Sales, Vendor, Customer, Billing, Inventory and Barcode modules.

TECHNICAL SKILLS

Languages: Java, SQL, JavaScript, HTML5, CSS3

Backend: Spring Boot, Spring MVC, JSP, Servlets, JDBC, Hibernate/JPA, RESTful APIs

Frontend: Angular, Tailwind CSS

Databases: MySQL, PostgreSQL, MongoDB

Core Concepts: OOP, Collections Framework, Exception Handling, DBMS, Operating Systems, MVC Architecture, Data Structures & Algorithms

Tools: Git, GitHub, Maven, Postman, IntelliJ IDEA, VS Code

EDUCATION

B.Tech in Computer Science Engineering — CGPA: 8.8/10

2022 – 2026

IPS Academy, Indore

Higher Secondary Education — 92% | Secondary Education — 92% (Seva Sadan Higher Secondary School)

Relevant Coursework: Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks

Coding Practice: Actively solving DSA problems on LeetCode
